

CleanSweep® DIN-Rail AC EMI Filter 250V 15A

Clean AC Power Improves Operation and Up-Time of Your Equipment

OnFILTER® CleanSweep® EMI filters provide noise-free AC power for your sensitive equipment. Innovative patented design accomplishes maximum noise suppression of signals polluting your power lines, freeing your equipment from harmful interference.

Clean power is essential for uninterrupted and problem-free operation of electrical and electronic equipment. As electromagnetic interference (EMI) spreads through power lines and ground, it causes downtime and errors in today's equipment and may inflict component damage.

Unique design of OnFILTER® CleanSweep® series focuses on the properties of real-life signals on power lines and ground and produces maximum attenuation of the "worst offenders" on power lines—switched mode power supplies (SMPS), servo and VFD, solenoids, and alike.

In addition to EMI filtering, CleanSweep® AC EMI filters provide unparallel reduction of transient surges unattainable by regular surge protectors.

Applications

- Electrical Panels
- Industrial control
- Utilities
- Oil and gas industry
- Water management
- Robotics
- Buildings
- Wherever EMI is a problem

Features

- Optimized for real-life power lines
- Effective noise suppression of all types of noise
- Common and differential EMI suppression
- Easy installation

Increased Up-Time

OnFILTER® CleanSweep® filters reduce equipment downtime caused by EMI and increase its performance and productivity by providing clean power to your sensitive equipment

Real-Life Applications

Unlike commodity filters designed for compliance measurements in a laboratory environment, CleanSweep® filters are optimized for effective suppression of noise in actual applications providing superb attenuation at lower frequencies where regular filters fail

Common and Differential Modes

OnFILTER® CleanSweep® filters provide effective suppression for differential mode (between power, live and neutral) and common-mode (between live, neutral and ground)

Advanced Surge Protection

OnFILTER CleanSweep® series filters add substantial performance improvements to conventional surge protection by reducing residual high-voltage "spikes" down to a negligible level

CleanSweep[®]
AC EMI Filter

DIN-Rail Mounted

Specification

OnFILTER CleanSweep® filters utilize patented technology to provide maximum noise suppression in actual installations, not just in the controlled laboratory environment and artificial environment, surpassing performance of typical EMI filters.

Parameter	AV2015NG
Rated Voltage, RMS	250V max.
Rated Current, RMS	15A max.
Leakage Current	<3.5mA
Power Indication	LED
Enclosure width	45mm (1.77") wide
Termination	Removable terminal block inserts
Wire Gauge	AWG 24...12

Typical Performance of AV2015NG in 1/100 Ohms Connection (Realistic Power Line)

Typical DM Attenuation at 100 kHz (SPMS Range)

Typical Transient Surge Attenuation

Mounting Dimensions

Need panel-mount or stand-alone filters? See the rest of our CleanSweep® family
